

## SOLUTION 2

### DEVELOPING THE LEADERSHIP CAPABILITY MODEL AND STANDARDS

To establish the Leadership Capability model and standards divided into 2 phases. The first phase is to develop a leadership capability assessment framework and in the second phase the Leadership capability model and standards are established.

## SOLUTION OVERVIEW

### Developing The Leadership Capability Framework

This leadership sub system program involves development of required leadership capability model and standard which will directly align and support the organizations strategic and operational needs. This process involves establishing the leadership competency and the values by the different levels of leadership in organization to create a symbolic leadership model and quantifiable leadership standards.
